

# Sedation Symposium

*Safe and Effective Sedation Is Possible*

## Course Overview

Dental Fear is one of the top reasons patients neglect completing necessary dental treatment. Eliminating obstacles for patient care is a gift every dental provider can provide to their community. During this program you and your team will learn or refresh your knowledge in the many methods of sedation from NO<sub>2</sub> to IV, patient selection, pharmacology trends, and managing airways. Build confidence as a team with scenario-based hands-on medical emergency drills, and review of proper equipment. Whether you are currently certified in any type of sedation or considering sedation this program is for you.

## Course Objectives

- Increase confidence to offer sedation to patients
- Implement reliable protocols to reduce or prevent medical emergencies
- Apply proper techniques for airway management
- Discover pharmacology updates
- Explore the effectiveness and usage of opioids in dentistry
- Build team efficiency and consistency through interactive training drills
